

Dishant Patel

React.js Developer

Surat, Gujarat, India | dishant.sureshbhai@gmail.com | +91 76000 22951 | dishant-patel.vercel.app | github.com/Dspatel204

PROFESSIONAL SUMMARY

React.js Developer with 3+ years of experience building scalable web applications, Shopify Apps, reusable UI components, performance-optimized interfaces, and modern responsive websites. Strong expertise in React, JavaScript, TypeScript, Next.js, Redux Toolkit, and Shopify App Development. Experienced in developing production-grade applications with reusable architecture, API integration, performance optimization, state management, and scalable frontend systems. Passionate about writing clean code, solving complex UI problems, and delivering pixel-perfect user experiences.

TECHNICAL SKILLS

React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, Context API, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Ant Design, Shopify Polaris, REST API, GraphQL, Git, GitHub, Webpack, Vite, Postman, Figma

PROFESSIONAL EXPERIENCE

React.js Developer — AD Digitech

Jan 2024 - Jul 2026

- Built scalable Shopify applications using React, TypeScript, and Polaris.
- Developed a drag-and-drop builder for creating responsive landing pages compatible with all Shopify themes.
- Built intuitive mobile bottom-navigation bars with fully customizable designs.
- Implemented mega menus, dropdowns, icons, badges, labels, and a drag-and-drop editor.
- Ensured mobile responsiveness and integrated analytics for user interaction tracking.
- Built a customizable Thank You / Order Status page solution, turning post-purchase pages into revenue channels.
- Developed upsell and cross-sell features with product bundles, collections, and personalized recommendations.
- Implemented coupon codes with countdown timers to drive urgency and repeat purchases.
- Created a drag-and-drop editor for banners, images, icons, trust badges, and CTAs — no coding required.
- Developed an automated SEO solution for Shopify stores to improve search rankings.
- Built tools for keyword analysis, SEO audits, and performance tracking with actionable insights.

- Built a no-code product customizer allowing Shopify merchants to offer 7+ option types, including swatches, font pickers, file uploads, and text fields.
- Implemented a real-time live preview so shoppers could see personalized designs such as engravings and monograms before purchase.
- Added conditional logic to dynamically show or hide options, along with dynamic pricing and add-ons synchronized across the cart and checkout.
- Worked on Product Options, Discount Apps, Landing Pages, Analytics, Mobile Menu, and SEO solutions.
- Improved application performance using optimized rendering strategies.
- Collaborated with backend developers, designers, and QA teams.

React.js Developer — Identixweb Pvt Ltd*Oct 2022 - Aug 2023*

- Developed a system to set shipping rates by zip/postal code with multicurrency support.
- Configured shipping charge rules based on cart total, weight, and specific zones.
- Enabled unlimited shipping zones with full analytics for order-receiving zones.
- display a price based and weight based rates
- Developed reusable UI components and custom Shopify app features.
- Integrated REST APIs and GraphQL APIs.
- Developed responsive user interfaces.

PROJECTS

LuvR Dating App

Modern dating application with real-time messaging, user matching algorithms, and responsive design for optimal user experience.

Technologies: React, Responsive

Demo: master--luvr-dating.netlify.app | **GitHub:** github.com/Dspatel204/luvr-dating

Empower Your Business (CoreTech Innovations)

CoreTech Innovations delivers cutting-edge technology services tailored for today's fast-paced world. The platform offers seamless real-time communications, AI-driven analytics, and resilient cloud infrastructure, wrapped in a responsive, user-centric design, equipping businesses with intelligent, data-powered tools for growth, efficiency, and innovation.

Technologies: React, Responsive

Demo: dspatelapp.netlify.app | **GitHub:** github.com/Dspatel204/coretechweb

Kanvika Jewellery

Kanvika offers an elegant and curated collection of handcrafted jewelry, ranging from statement jhumkas and ornate neckpieces to oxidised silver bangles. The site combines rich visuals with clear product specifications (materials, dimensions, weight) and styling guidance, emphasizing quality craftsmanship and easy care for shoppers seeking traditional, festive, or everyday ethnic pieces with a modern touch.

Technologies: React, Interactive UI

Demo: kanvika.netlify.app | **GitHub:** github.com/Dspatel204/website

Product Grid

Built a high-performance product grid with virtualization and smart caching. Edit state keyed by unique product IDs to avoid data pollution from virtualization DOM recycling. Cache keys computed from query parameters (query, sortBy, order, category, skip) for accurate cache hits. Implemented a lean state-driven virtualizer tracking scroll position, rendering only the visible window plus a buffer, using CSS transforms for smooth 60fps performance over large datasets.

Technologies: React, Virtualization, Performance, Data Grid
