Building Shopify-native commerce tools — builders, upsells, and SEO automation.

EXPERIENCE

React JS Developer

Jan 2024 — Jul 2026

AD Digitech, Surat, India

- Developed a drag-and-drop builder for creating responsive landing pages compatible with all Shopify themes.
- Designed pixel-perfect pages for mobile and desktop without requiring coding skills.
- Integrated conversion-boosting elements including customizable designs, animations, and analytics.
- Built intuitive mobile bottom-navigation bars with fully customizable designs.
- Implemented mega menus, dropdowns, icons, badges, labels, and a drag-and-drop editor.
- Ensured mobile responsiveness and integrated analytics for user interaction tracking.
- Built a customizable Thank You / Order Status page solution turning post-purchase pages into revenue channels.
- Developed upsell and cross-sell features with product bundles, collections, and personalized recommendations.
- Implemented coupon codes with countdown timers to drive urgency and repeat purchases.
- Created a drag-and-drop editor for banners, images, icons, trust badges, and CTAs — no coding required.
- Developed an automated SEO solution for Shopify stores to improve search rankings.
- Implemented meta tag optimization, structured data generation, and automatic sitemap creation.
- Built tools for keyword analysis, SEO audits, and performance tracking with actionable insights.
- Built a no-code product customizer letting Shopify merchants offer 30+ option types — swatches, font pickers, file uploads, and text fields.
- Implemented a real-time live preview so shoppers can see personalized designs like engravings and monograms before purchase.
- Added conditional logic to show or hide options dynamically, plus dynamic pricing and add-ons synced across cart and checkout.

React JS Developer

Oct 2022 — Aug 2023

Identixweb Pvt Ltd, Surat, India

- Developed a system to set shipping rates by zip/postal code with multicurrency support.
- Configured shipping charge rules based on cart total, weight, and specific zones.
- Enabled unlimited shipping zones with full analytics for order-receiving zones.
- Created a comprehensive shipping rate comparison and management system for Shopify merchants.
- Developed custom shipping rules based on product tags, customer tags, and cart conditions.
- Implemented real-time rate calculation across multiple carriers and delivery options.
- Built multi-carrier rate comparison for LTL freight and parcel shipping, showing live quotes at checkout.
- Added BOL generation, shipping label printing, and real-time shipment tracking for freight orders.
- Enabled carrier account and discounted-rate management across major LTL freight carriers.

React JS Developer

Mar 2022 — Sep 2022

Infinity Softech, Surat, India

- Converted Figma, Illustrator, and Photoshop designs into responsive HTML, CSS, and JavaScript websites.
- Built e-commerce websites with bundle discounts, percentage-based discounts, and checkout systems.
- Developed a Google Tasks-like application with task creation, editing, priority setting, and filtering.
