PROFESSIONAL SUMMARY

React JS Developer with over 3 years of experience building Shopify-native commerce applications, including drag-and-drop page builders, upsell and cross-sell tools, automated SEO solutions, and no-code product customizers. Skilled in React.js, Next.js, JavaScript, and TypeScript, with a strong track record of delivering pixel-perfect, mobile-responsive, conversion-focused features for e-commerce merchants.

SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: Shopify Polaris, Bootstrap, Material-UI, Tailwind CSS

Design Tools: Figma, Illustrator, Photoshop, claude-artifacts

WORK EXPERIENCE

React JS Developer

Jan 2024 – July 2026

AD Digitech, Surat, India

- Built scalable Shopify applications using React, TypeScript, and Polaris.
- Developed a drag-and-drop builder for creating mobile menu on landing pages compatible with all Shopify themes.
- Built intuitive mobile bottom-navigation bars with fully customizable designs.
- Implemented mega menus, dropdowns, icons, badges, labels, and a drag-and-drop editor.
- Ensured mobile responsiveness and integrated analytics for user interaction tracking.
- Built a customizable Thank You / Order Status page post-purchase pages for shopify themes.
- Developed upsell and cross-sell features with product bundles, collections, and personalized recommendations.
- Implemented coupon codes with countdown timers to drive urgency and repeat purchases.
- Created a drag-and-drop editor for banners, images, icons, trust badges, and CTAs — no coding required.
- Developed an automated SEO solution for Shopify stores to improve search rankings.
- Built tools for keyword analysis, SEO audits, and performance tracking with actionable insights.
- Built a no-code product customizer allowing Shopify merchants to offer 7+ option types, including swatches, font pickers, file uploads, text fields.
- Implemented a real-time live preview so shoppers could see personalized designs such as engravings and monograms before purchase.
- Added conditional logic to dynamically show or hide options, along with dynamic pricing and add-ons synchronized across the cart and checkout.
- Worked on Product Options, Discount Apps, Landing Pages, Analytics, Mobile Menu, and SEO solutions.
- Improved application performance using optimized rendering strategies.
- Collaborated with backend developers, designers, and QA teams.

React JS Developer

Oct 2022 – Aug 2023

Identixweb Pvt Ltd, Surat, India

- Developed a system to set shipping rates by zip/postal code with multicurrency support.
- Configured shipping charge rules based on cart total, weight, and specific zones.
- Enabled unlimited shipping zones with full analytics for order-receiving zones.
- display a price based and weight based rates
- Developed reusable UI components and custom Shopify app features.
- Integrated REST APIs and GraphQL APIs.
- Developed responsive user interfaces.

React JS Developer

Mar 2022 – Sep 2022

Infinity Softech, Surat, India

- Converted Figma, Illustrator, and Photoshop designs into responsive HTML, CSS, and JavaScript websites.
- Built e-commerce websites with bundle discounts, percentage-based discounts, and checkout systems.
- Developed a Google Tasks-like application supporting task creation, editing, priority setting, and filtering.

PROJECTS

Product Grid

React | Performance Engineering

Live Demo: product-grid-table.vercel.app | *GitHub:* github.com/Dspatel204/product-grid-table

- Built a high-performance React product data grid with virtualization to render large datasets efficiently.
- Implemented a lean state-driven virtualizer that tracks scroll position and renders only the visible window with a two-row buffer.
- Used CSS absolute positioning and translateY transforms to maintain stable row placement and smooth scrolling performance.
- Keyed edit state by unique product IDs using Record<number, EditState> to prevent data pollution caused by virtualized DOM recycling.
- Implemented smart caching with JSON.stringify-based cache keys covering query, sortBy, order, category, and skip parameters.

CollegeHub - College Management System

Full-Stack React Application

Live Demo: college-management-beryl.vercel.app | *GitHub:* github.com/Dspatel204/college-management

- Built a full-stack college management system using TanStack Start, React 19, Tailwind CSS v4, and shadcn/ui.
- Developed dashboards with statistics and charts plus modules for student, faculty, course, attendance, fee, exam, library, transport, notice, messaging, reporting, and settings management.
- Used TanStack Router and TanStack Query v5 for type-safe routing, server-state management, data fetching, and caching.
- Implemented validated forms with React Hook Form and Zod, and data visualizations with Recharts.
- Configured Vite 7 and Nitro for production deployment on Vercel.

EDUCATION

Bachelor of Science

2019 – 2022

P L Chachun Science College, Surat, India
